# Products Appearance Description

Antenna, Screen Switch, Horn, WAN, USB Interface, Power Input Port, HDD Enclosure

## Wi-Fi NVR Kits Quick Installation Guide

### 1. Install HDD.

Make sure all power is disconnected before installing.

Notes: Please use the 2.5 inch professional hard disk recommended by supplier.

- (1) Move the NVR screen down and raise the base.
- (2) Remove the cover in the direction of the arrow.
- (3) Point the hard disk face up and the interface to the device.
- (4) Insert the device in the direction of the arrow along the card slot.
- (5) Cover the hard disk cover.
- (6) Installation is complete.

## 2. Make sure Wi-Fi NVR Kits working well.

After the NVR and all IPCs are powered on, all IPC videos appear on the NVR screen, the device works normally and can be installed in the next step.

Notes: Please use the matched power supply in the package to prevent the NVR from working properly or damaging the NVR when the power supply is not working properly.

Wi-Fi IPC

## 3. Adjusting the Antenna:

The NVR antenna transmits signals to the surroundings. When the NVR and the IPC antenna are at the same height and parallel to each other, the effect is best. If the NVR can not be the same height, the IPC antenna should be tangent to the sphere with the center of the NVR (Figure 1, Figure2- 2). Don't let the antenna point directly NVR (Figure 2-1), according to the figure can be placed correctly.

## System login

Start up the NVR, right click the desktop and enter the user login interface. Input the user name and password.

System default user name : "admin" password : "12345".

The image shows a 'User Login' window with a red title bar and a close button (X) in the top right corner. The window has a dark grey background. It contains the following elements from top to bottom: a dropdown menu with a user icon and the text 'admin'; a password input field with a lock icon; a dropdown menu with the text 'English'; a 'Login' button; a 'Close' button; and a yellow underlined link that says 'Forget password'.

## Live View

After the device is started, you can enter the preview screen. The system date, time, and channel name can be seen on the preview screen. After logging in to the system, double-click the left mouse button to preview the single screen; double-click the left mouse button again to return to the multi-screen preview.

## Menu operation instruction

Right click to popup shortcut menu, the menu consists with the following three parts:

- 1) Preview mode: Select the preview mode in the menu bar you like, such as **【1-Win】** or **【4-Win】**.
- 2) Shortcut menu mode: It contains **【Poll】**, **【Record】**, **【Add Camera】**, **【Playback】**, **【PTZ】** and **【NVR Image】**, you can click and the enter corresponding menu directly. After the setting is completed and the application is saved, click the right mouse button on the setting interface to exit the interface or return to the previous menu.
- 3) Main menu: It contains **【Playback】**, **【Export】**, **【HDD】**, **【Record】**, **【Camera】**, **【Configuration】**, **【Maintenance】**, **【Shutdown】** eight parts.

## Recording Setting

- 1) Enter "Record" interface to set recording from shortcut menu **【Record】** or main menu. Default setting is all channels are recorded 24 hours a day.
- 2) Check **【Motion Detection】** to open the motion detection video.
- 3) The motion sections have no more than 6 time periods each day, and the device can perform normal recording or motion detection recording during the planned time period. If normal record and motion record are overlapped, it can only save the motion records while motion detection comes up.

## Playback

- 1) Enter "Playback" interface by clicking "Playback" from shortcut or main menu.
- 2) Select channels, record mode, date and search the record files, click the play button in the lower left corner of the interface to play the video file, or drag the time progress bar to play the video file at the specified time.

(Video playback interface)

# PC Side LAN Access
